WOMEN'S WOES

Barre Women Are Finding Relief at Last.

It does seem that women have more than a fair share of the aches and pains that afflict humanity; they must "keep up," must attend to duties, in spite of constantly aching backs, or headaches, dizzy spells, bearing-down pains; they must stoop over, when to stoop means torture. They must walk and bend and work, with aching backs and many aches from kidneyills. Kidneys cause more suffering than any other organ of the body. Keep the kidneys well, and health is easily maintained. Read of a remedy for kidneys only that helps and cures the kidneys, and is endorsed by people you know.

Mrs. Eliza Mitchell, 42 Maple Avenue, Barre, Vt., says: "I was subject to attacks of kidney complaint for some time. The passages of the kidney stones were too frequent, and I also had severe pains in my back and hips. I was subject to dizzy spells, and any cold I caught was sure to make the trouble worse. A member of my family had used Doan's Kidney Pills and was greatly benefited. I decided to give them a trial. I got a box at E. A. Doan's drug store and had taken an elixir. A few doses before I experienced relief. I have taken Doan's Kidney Pills occasionally since then, and have found that they act as a tonic to my kidneys, helping those organs in a normal condition. I consider it a pleasure, as well as a duty, to make the value of this remedy known to other kidney sufferers."

Foalts are sold by all dealers. Price 50 cents. Doan's Kidney Pills, Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

THE NEW BUREAU OF MINES.

Continuation of Work Begun by the Geological Survey.

The new federal Bureau of Mines began operations July 1, 1910, as a branch of the Interior department co-ordinate with the geological survey and continues the technologic work heretofore done by the survey.

The work of the technologic branch of the survey has been carried on for several years under appropriations made by Congress for specified purposes, but before the technologic branch was organized the survey had made many technological investigations. Among these investigations were those reported in the papers listed below.

1882. Metallurgy of the ores of Leadville, Colo., by Antony Guyard; in second annual report.

1883. Electrolysis in the metallurgy of copper, lead, zinc and other metals, by C. O. Mallouk; in Mineral Resources of the United States, 1882.

1884. Assaying and metallurgy of the Eureka district, Nevada, by J. S. Curtis. Monograph 7.

1885. The present technical condition of the steel industry in the United States, by Phineas Barnes. Bulletin 25.

1886. American blast-furnace progress, by John Birkinbine in Mineral Resources of the United States, 1883 and 1884.

1887. Quicksilver at New Almaden, by Samuel B. Christy; in Mineral Resources of the United States, 1883 and 1884.

1888. The cupola smelting of copper in Arizona, by James Douglas, Jr.; in Mineral Resources of the United States, 1883 and 1884.

1889. Recent improvements in desilvering lead, by H. O. Hoffman; in Mineral Resources of the United States, 1883 and 1884.

1890. Copper smelting by Henry M. Howe. Bulletin 20.

1891. Metallurgy of the ores of Leadville, Colo., by Antony Guyard; in monograph 12.

1892. Chemistry of the rocks and ores of Leadville, Colo., by W. F. Hillibrand; in monograph 12.

1893. Salt-making processes in the United States, by T. M. Chatard; in seventh annual report.

1894. Natural soda: its occurrence and utilization, by T. M. Chatard; in bulletin 60.

1895. Methods of assaying gold telluride ores, by W. F. Hillibrand and E. T. Allen. Bulletin 233.

1896. Methods and cost of gravel and placer mining in Alaska, by C. W. Purtington. Bulletin 203.

1897. Prospecting and mining gold placers in Alaska, by J. P. Hutchins; in bulletin 343.

The demand for these reports long ago exhausted the editions printed.

In addition to these investigations, important work in standardizing assays and analyses of iron ores, zinc ores and arsenic and phosphate rocks has been done by chemists of the survey, and an elaborate report on the technology of the precious metals was compiled for the tenth census by the geologists Emmons and Becker.

Special appropriations for tests of costs and lignites were first made by Congress in 1894. Later appropriations provided for tests of structural materials and for investigations of mine accidents. Thirty-nine reports on these subjects have thus far been issued, but the demand for some of them has completely exhausted the editions published. A list of these technologic reports can be obtained by applying to the director of the geological survey at Washington.

WORD FROM SCRIBE.

G. A. Almworth, In Heaton Hospital, Appreciates Remembrances.

Editor, Barre Daily Times: Will kindly allow your old Williamstown newspaper space in The Times to say that he has just been delightedly overwhelmed to-day with birthday remembrances, so many, in fact, that he would hardly undertake now to acknowledge them, each and all separately, but he desires to say here that his surprise and delight were great, indeed, and he takes this opportunity to thank most heartily each and every one who so kindly remembered him with birthday greetings. From the boxes of lovely and fragrant flowers sent, he took the first breath of their delicious odors, and then sent them to some of the sick here in the hospital, that are far greater invalids than himself. One of our friends expresses the hope that we may soon take up the reader's pen again for The Times. Indeed, we are already eager to do that. Our physician here tells us we see no reason why we may not be as well as we have been in the late past, and we assure one and all of the old friends and readers of our items that it will be a greater pleasure, if possible, to serve them in the future than in the past. With kindest greetings to one and all.

Cushman & Ward,
1 Pearl Street

Work 24 Hours a Day.
The busiest little things ever made are Dr. King's New Life Pills. Every pill is a sugar-coated globe of health, that changes weakness into strength, languor into energy, brain-fat into mental power; curing constipation, headache, chills, dyspepsia, malaria; 25¢ at the Red Cross Pharmacy.

Gill Judge, No. 57, L. O. O. F., will work the initiatory degree at the next regular meeting, Tuesday evening, July 26, at 7:30 p. m.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional treatment, which is the only named condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound imperfect hearing, and a desire to swallow. This is a common disease, called Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give one hundred dollars for any case of deafness caused by catarrh that cannot be cured by Hall's Catarrh Cure. To obtain circulars, free.

Dr. G. C. GRAYSON & CO., Toledo, Ohio.

Gold by Druggists. See Dr. Hall's Family Pill for constipation.

Take Hall's Family Pill for constipation.

Dr. G. A. ALMORTH, Montpelier, July 10.

Sincerely,

G. A. Almworth, Montpelier, July 10.

Notice.

No. 127, 150 acres. One of the best farms in New England. Only three-fourths miles from Barre city. Land is nicely divided and has good drainage. Land lies well and is the best of soil. All machine growing. Fine fence. Plenty of fruit. Fifty cherry trees. Good sugar and maple trees. Two fine barns. House is dandy. Running water at house and barns. Several fine springs of water on this farm. It is a beauty and one of the best-paying farms in the state. Accept any offer. All expenses paid. Accept any substitute. A trial package will be sent FREE to any mother who will address Allen S. Dimond, La Rue, N. Y.

NEW PRIZES AT STATE FAIR.

Vermont's Monthly Magazine Will Interest Youngsters in Morgan Horse.

The Vermonter, the state monthly, is to take a part in the forthcoming annual state fair, to be held at White River Junction September 20 to 23, inclusive. Two prizes are offered of \$20 each, one for the best essay written by any Vermonter boy or girl under 21 years of age on the subject of the Morgan horse, the essay to be in the office of The Vermonter not later than September 1, 1910. The second prize of \$20 for the best review of the Morgan horse classes at the state fair of this year, the manuscripts to be submitted to The Vermonter before October 15, 1910.

Each composition must be in the handwriting of the contestant, must be written in black ink on ruled foolscap and on but one side of the paper and shall contain not less than two thousand words. All authorities which have been consulted must be mentioned. Each composition must be signed with the author's full name, giving also age and post office address. The English spelling, penmanship and neatness of the party who instigated the deed, and if the facts can be proven prosecutions will follow.
